Concluding an agreement and opening a personal account

Private individuals
Entrepreneurs
Legal entities

**Enhanced
Qualified
Electronic
Signature**

Functions of the registry administrator

Agreements are concluded by submitting an application to the administrator
(Clause 38 of the Regulations for maintaining the CU register, Clause 12 of the Agreement Template)

Opening a personal account
(Clause 38 of the Regulations for maintaining the CU register, Clause 7 (a) Tariffs)

What is the purpose of an electronic power of attorney?

An electronic power of attorney allows applications for public services to be submitted by company employees.

In the default condition, applications can only be submitted by the company managing director. The electronic power of attorney allows this task to be delegated to other employees.

Who has the authority to issue an electronic power of attorney and to whom?

Company managing directors are normally authorized to issue an electronic power of attorney:

- to employees assigned to company activities
- to any other persons with a verified account on the State Services portal

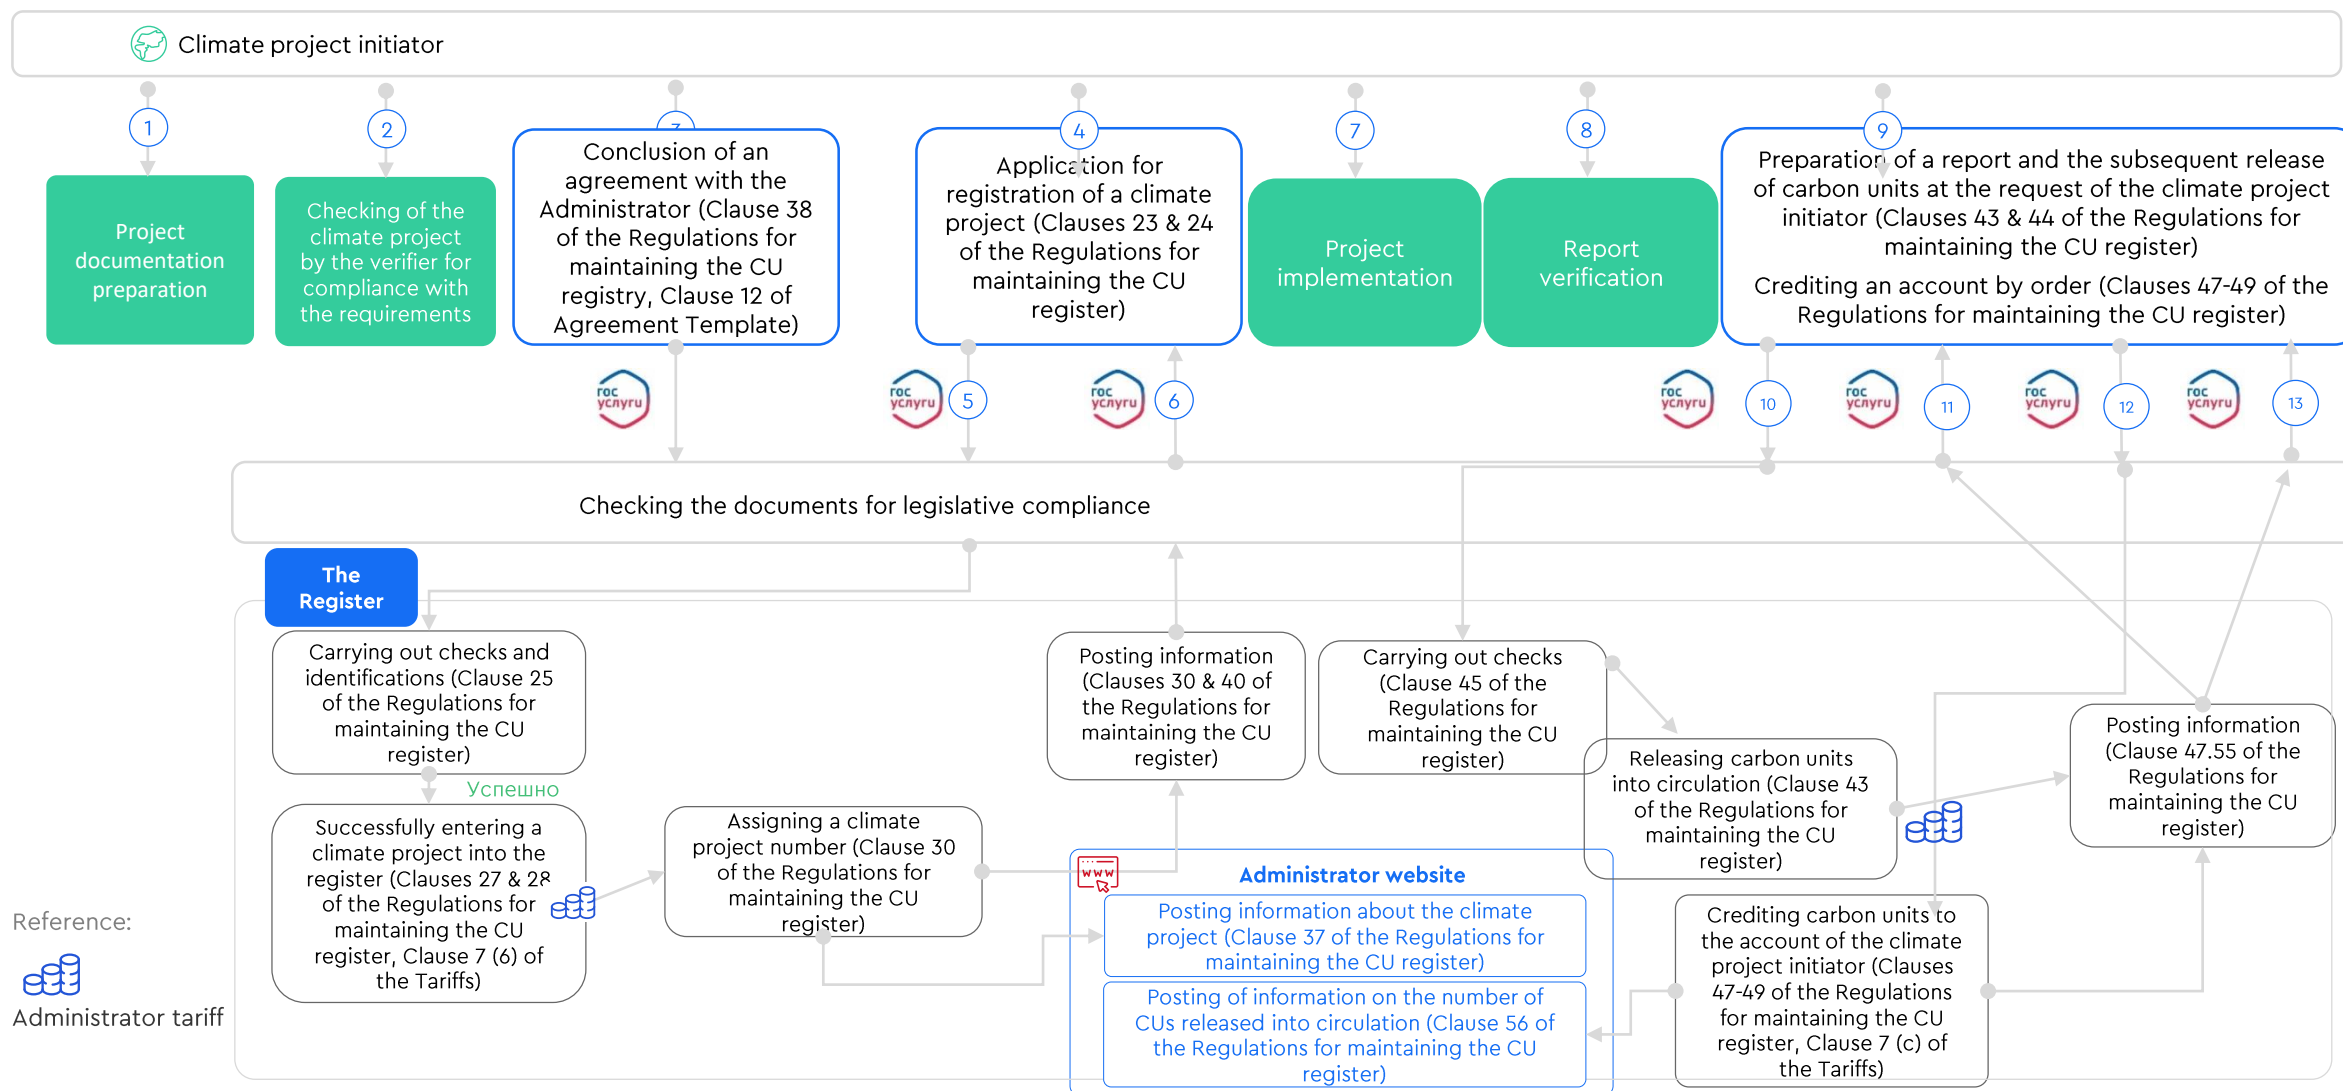

Any employee with administrator rights can prepare an electronic power of attorney for signing by the head of the company

Reference:  Administrator tariff

Registering a climate project

A climate project is a set of measures intended to reduce (prevent) greenhouse gas emissions or increase their absorption, taking into account the absorption capacity of forests and other ecosystems

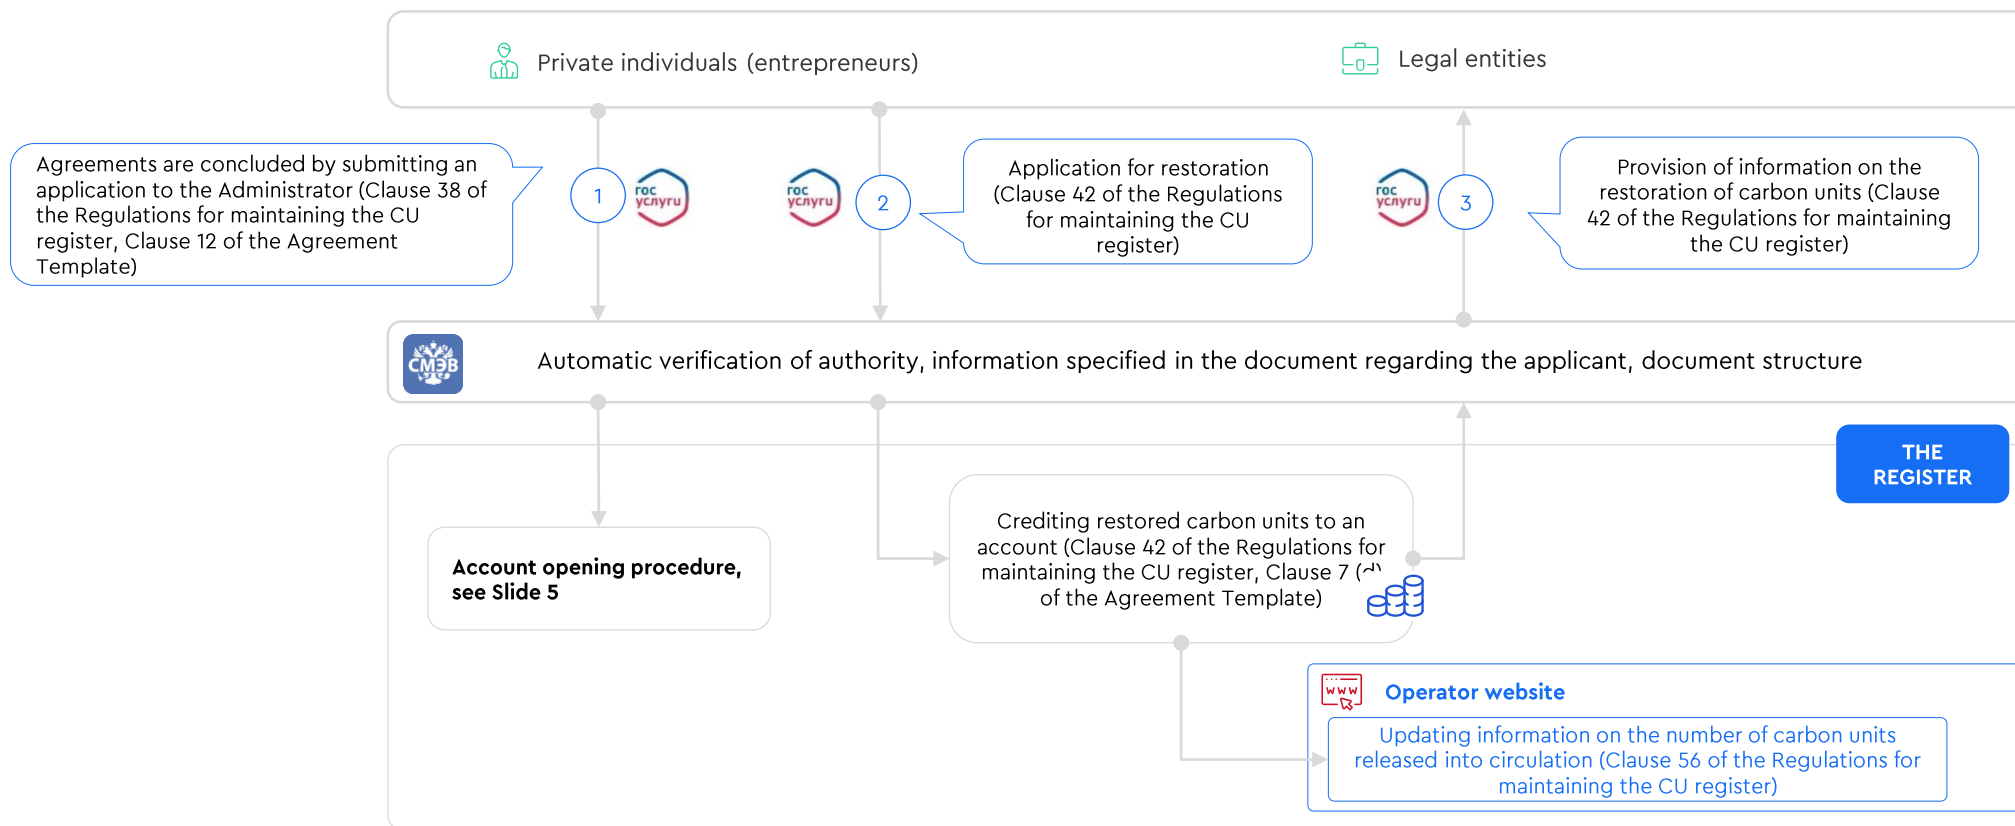

Transferring carbon units

Restoring carbon units in the register

Carbon units lost as a result of account closure due to termination of the agreement with the administrator (see Clause 42 of the Regulations for maintaining the CU register) can be restored and credited to the account of the transaction participant following application, provided that **the agreement is re-concluded** and the **account re-opened within 6 months of the date of cancellation of the last carbon units**
