

RUSSIAN FEDERATION GOVERNMENT

RESOLUTION

No. 790

dated April 30, 2022

(version of May 28, 2026)

ON ADOPTION OF RULES FOR ESTABLISHMENT AND MAINTENANCE OF CARBON
UNITS REGISTRY, AS WELL AS FOR CONDUCTING TRANSACTIONS WITH CARBON
UNITS IN CARBON UNITS REGISTRY

In accordance with Part 1 of Article 10 of the Federal Law “On Limitation of Greenhouse Gas Emissions”, the Government of the Russian Federation hereby resolves:

1. To approve the appended Rules for establishment and maintenance of the carbon units registry, as well as for conducting transactions with carbon units in carbon units registry.
2. This Resolution shall enter into force on September 1, 2022 and shall be valid until September 1, 2028.

Chairman of the Government
of the Russian Federation
M. MISHUSTIN

Approved by Resolution
of the Government of the Russian Federation
No. 790 dated April 30, 2022

RULES FOR ESTABLISHMENT AND MAINTENANCE OF CARBON UNITS REGISTRY,
AS WELL AS FOR CONDUCTING TRANSACTIONS WITH CARBON UNITS IN CARBON
UNITS REGISTRY

1. These Rules establish the procedure for the establishment and maintenance of the carbon units registry (hereinafter referred to as the Registry), as well as for conducting transactions with carbon units and units for fulfilling the greenhouse gas emissions quota (hereinafter referred to as quota fulfillment unit) in the Registry.

2. The Registry is an information system in which climate projects have been registered and records are kept of carbon units and quota fulfillment units, as well as of transactions with carbon units and quota fulfillment units provided for by the legislation of the Russian Federation and international treaties of the Russian Federation.

3. The Registry contains information provided for by Parts 1 - 2(1) of Article 10 of the Federal Law “On Limitation of Greenhouse Gas Emissions”, as well as information provided for by Part 6 of Article 11 of the Federal Law "On Conducting an Experiment to Limit Greenhouse Gas Emissions in Certain Constituent Entities of the Russian Federation".

4. The template of the standard agreement on the provision by the operator of services for conducting transactions in the Registry (hereinafter referred to as the Agreement) and the procedure for determining the fee for the provision of such services shall be established by the Government of the Russian Federation in accordance with Part 5 of Article 10 of the Federal Law "On Limitation of Greenhouse Gas Emissions".

5. The operator shall conduct transactions in the Registry after the conclusion of the Agreement.

6. The processing of personal data and their protection shall be conducted by the operator in accordance with the legislation of the Russian Federation in the field of personal data.

7. The classification of information contained in the Registry as open and publicly available shall be conducted taking into account the requirements of the legislation of the Russian Federation on commercial, official and other secrets protected by law, the legislation of the Russian Federation in the field of personal data, as well as in accordance with the requirements of these Rules.

8. Publicly available information contained in the Registry shall be published on the official website of the operator on the information and telecommunications network "Internet" (hereinafter referred to as the official website) by the operator at least once a month.

In order to increase the level of openness of activities in the field of reduction (prevention) of greenhouse gas emissions or enhancement of their removals, the operator shall have the right to post on the official website analytical and other information (including with the consent of the owner (holder) of such information, if necessary), including the following data:

- the total number of climate projects being implemented and registered in the Registry;
- the total number of carbon units planned to be issued into turnover, specified during registration in the Registry of the climate projects being implemented;
- the total number of carbon units and quota fulfillment units in turnover;
- the total number of retired carbon units, both in aggregate and by the purposes specified in paragraph 60 of these Rules in accordance with the Federal Law "On Limitation of Greenhouse Gas Emissions" and the Federal Law "On Conducting an Experiment to Limit Greenhouse Gas Emissions in Certain Constituent Entities of the Russian Federation".

9. The establishment and maintenance of the Registry shall be conducted by the operator using its own funds and resources.

10. Protection of information contained in the Registry shall be conducted by the operator in accordance with the legislation of the Russian Federation on information, information technologies and information protection.

11. Storage of information contained in the Registry shall be conducted by the operator under conditions that ensure the prevention of loss, distortion and forgery of information in accordance with the legislation of the Russian Federation on information, information technologies and information protection.

12. Information shall be entered into the Registry in the Russian language. With respect to projects implemented for the purposes of the Russian Federation's international cooperation in the field of limitation of greenhouse gas emissions (hereinafter referred to as international cooperation), information may also be entered into the Registry and reports on the status of the Registry, as provided for in the fourth paragraph of paragraph 67 of these Rules, in the English language.

13. The operator, within the framework of maintaining the Registry, carries out the following operations:

- a) registration of a project;
- б) amending information (data) about a climate project and/or about a participant in the turnover of carbon units;
- в) opening and closing an account in the Registry;
- г) transactions on the account in the Registry;
- д) issuance of carbon units into turnover;
- е) other operations in accordance with the requirements of the legislation of the Russian Federation in the field of limiting greenhouse gas emissions, international treaties of the Russian Federation and the Agreement.

14. The operator's receipt of information, requests, instructions and provision of information from the Registry to state authorities involved in the provision of state and municipal services and the execution of state and municipal functions, including control (supervisory) functions, and to notaries shall be carried out using the infrastructure that ensures information technology interaction of information systems used for the provision of state and municipal services and the execution of state and municipal functions in electronic form in accordance with Resolution of the Government of the Russian Federation No. 451 dated June 8, 2011 "On the infrastructure ensuring information technology interaction of information systems used for the

provision of state and municipal services and the execution of state and municipal functions in electronic form" using the unified system of interagency electronic interaction.

15. Maintenance of the Registry shall be carried out taking into account the requirements of the legislation of the Russian Federation on commercial, official and other secrets protected by law and the legislation of the Russian Federation in the field of personal data.

16. The Registry shall indicate the following information about a person having an account in the Registry (hereinafter referred to as the accountholder), and another person whose carbon footprint is reduced by the retirement of carbon units of the accountholder (hereinafter referred to as the other person):

a) in relation to a legal entity (except for a foreign legal entity that does not have a permanent establishment in the Russian Federation):

- name;
- legal form;
- primary state registration number;
- date of state registration;
- location and address;
- taxpayer identification number;
- information on the types of economic activities carried out (in accordance with the All-Russian Classifier of Types of Economic Activity);
- Legal Entity Identifier (LEI) (if available);

a(1)) in relation to a foreign legal entity that does not have a permanent establishment in the Russian Federation:

- name;
- legal form;
- date and number of state registration;
- country, location and address;
- taxpayer identification number (if available);
- Legal Entity Identifier (LEI);

6) in relation to a natural person (except for a foreign citizen), including an individual entrepreneur:

- surname, first name, patronymic (if any);
- type, series, number and date of issue of the identity document;
- date of birth;
- place of residence;
- insurance number of the individual personal account (if any);
- taxpayer identification number;
- date of state registration of the person as an individual entrepreneur (for individual entrepreneurs);
- primary state registration number (if any);
- information on the types of economic activities carried out (in accordance with the All-Russian Classifier of Types of Economic Activity) (if any);

6(1)) in relation to a foreign citizen, including an individual entrepreneur:

- surname, first name, patronymic (if any);
- type, series, number and date of issue of the identity document;
- date of birth;
- country and place of residence;
- date of state registration of the foreign citizen as an individual entrepreneur (for individual entrepreneurs);
- taxpayer identification number (if available);

б) in relation to a legal entity or individual entrepreneur classified as a regionally regulated entity in accordance with the Federal Law "On Conducting an Experiment to Limit Greenhouse Gas Emissions in Certain Constituent Entities of the Russian Federation":

- information provided for in subparagraph "a" or "a(1)" of this paragraph, if the regionally regulated entity is a legal entity, or subparagraph "б" or "б(1)" of this paragraph, if the regionally regulated entity is an individual entrepreneur;
- information on the established quota (if any);

- information on actual greenhouse gas emissions in the reporting period (in accordance with the data specified in the carbon reporting);

- information on the verification of carbon reporting (name and primary state registration number of the legal entity accredited in the national accreditation system (hereinafter referred to as the accredited entity) (details of the positive verification opinion (date and number), name and unique number of the accreditation record in the register of accredited persons).

17. The Registry shall indicate the following information about a climate project:

- a) information about the project proponent and other participants of the climate project, including investors, contractors, to the extent of the information specified in subparagraphs "a" through "6(1)" of paragraph 16 of these Rules;

- 6) individual number of the climate project;

- b) name of the climate project;

- r) location of the climate project implementation (location of the land plot or land plots on which the climate project is implemented (including address and/or geographical indication), as well as the coordinates of characteristic boundary points of each land plot on which the climate project is implemented, if such coordinates were provided by the participant in the turnover of carbon units (hereinafter referred to as the applicant);

- д) start date and timeframes for the implementation of the climate project (including information on the date of the decision on financial support for the climate project activities, the date of commencement of climate project implementation activities, the expected (actual) date of completion of climate project implementation, as well as information on the period during which the reduction (prevention) of greenhouse gas emissions and/or enhancement of their removals as a result of climate project implementation is to be accounted for);

- e) documents and information, taking into account the restrictions provided for in paragraph 7 of these Rules, submitted by the project proponent to the accredited entity for the conformity assessment of the project as a climate project provided for by Part 2(1) of Article 9 of the Federal Law "On Limitation of Greenhouse Gas Emissions", the report on the said assessment and the positive opinion of the accredited entity, details (date and number) of such report and positive opinion, as well as information about the accredited entity (name and primary state registration number of the accredited entity, unique number of the accreditation record in the register of accredited persons);

ж) information on the goals, objectives and category of the climate project (reduction (prevention) of greenhouse gas emissions and/or enhancement of their removals), information and documents on the approval by the Ministry of Economic Development of the Russian Federation of the project as a project for international cooperation purposes (hereinafter referred to as a project for international cooperation purposes and project approval, respectively) (if available), as provided for in the Additional Conditions for Project Registration in the Carbon Units Registry and Issuance of Carbon Units as a Result of the Implementation of Climate Project for the Purpose of International Cooperation of the Russian Federation in the Field of Limitation of Greenhouse Gas Emissions, approved by Resolution of the Government of the Russian Federation No. 234 dated March 5, 2026 "On the Adoption of Additional Conditions for Project Registration in the Carbon Units Registry and Issuance of Carbon Units as a Result of the Implementation of Climate Project for the Purpose of International Cooperation of the Russian Federation in the Field of Limitation of Greenhouse Gas Emissions" (hereinafter referred to as the Additional Conditions for Project Registration and Carbon Unit Issuance), including the details (date and number) of the decision on project approval, and the summary report on public consultations regarding the project, prepared in accordance with the Additional Conditions for Project Registration and Carbon Unit Issuance (if available);

з) information on the sectoral affiliation of the climate project (in accordance with the All-Russian Classifier of Types of Economic Activity);

и) list of objects of economic and other activities, the functioning of which is accompanied by greenhouse gas emissions and/or their removals;

к) description and justification of the greenhouse gas emission and removal scenario in the absence of the climate project and the greenhouse gas emission and removal scenario under the condition of the climate project implementation;

л) the climate project methodology in accordance with the classification provided for in Part 2 of Article 9 of the Federal Law "On Limitation of Greenhouse Gas Emissions", and the plan for monitoring the implementation of the climate project;

м) information on the estimated amount of greenhouse gas emission reduction (prevention) and/or enhancement of removals as a result of the climate project implementation;

н) information on the number of carbon units planned to be issued into turnover upon registration of the project in accordance with paragraphs 34 and 35 of these Rules;

о) information on the implementation status of the climate project (current status);

n) the report on implementation of the climate project, prepared according to the template established by the Ministry of Economic Development of the Russian Federation in accordance with Part 4 of Article 9 of the Federal Law “On Limitation of Greenhouse Gas Emissions”, with the attachment of the report on verification of the climate project implementation outcomes, including a positive opinion on the verification of the climate project implementation outcomes prepared in accordance with Resolution of the Government of the Russian Federation No. 455 dated March 24, 2022 "On Approval of the Rules for Verification of Climate Project Implementation Outcomes" and Resolution of the Government of the Russian Federation No. 618 dated May 28, 2026 “On Adoption of the Template for the Report on Verification of Climate Project Implementation Outcomes” (hereinafter referred to as the project report), as well as details of the said documents (date and number), information on the number of carbon units issued into turnover as a result of the climate project implementation, information about the accredited entity (name and primary state registration number of the accredited entity, name and unique number of the accreditation record in the register of accredited persons), information and documents on the approval by the Ministry of Economic Development of the Russian Federation of the issuance of carbon units as a result of climate project implementation for international cooperation purposes (hereinafter referred to as approval of carbon unit issuance), as provided for in the Additional Conditions for Project Registration and Carbon Unit Issuance (if available), including the details (date and number) of the decision on approval of carbon unit issuance;

p) information on the total number of carbon units in turnover within the framework of the climate project, as well as additional information for the purposes of international cooperation;

c) information on assigning the status "archival" to the information about the climate project in respect of the record on the climate project in case of termination of the Agreement with the project proponent, indicating the date and grounds for termination of the Agreement.

т) information on the contribution of the climate project to the achievement of sustainable development, as well as the national development goals of the Russian Federation as defined by Presidential Decree No. 309 dated May 7, 2024 "On National Development Goals of the Russian Federation for the Period until 2030 and the Perspective until 2036" (if provided for in accordance with the climate project methodology);

y) information on the absence of adverse social and environmental effects (if provided for in accordance with the climate project methodology).

18. The Registry shall indicate the following information on the account in the Registry:

a) information about the accountholder in accordance with paragraph 16 of these Rules;

6) information on the number of carbon units and/or quota fulfillment units in the account in the Registry as of the current date;

в) information on carbon units credited to the account in the Registry as a result of the climate project implementation (number of carbon units and date of their crediting, information on the presence or absence of the decision on approval of carbon unit issuance provided for in the Additional Conditions for Project Registration and Carbon Unit Issuance, individual number of the climate project, date of preparation of the report on implementation of the climate project and its details, name and unique number of the accreditation record in the register of accredited persons of the accredited entity, date of signing and number of the report on verification of the climate project implementation outcomes and the opinion on verification of the climate project implementation outcomes);

в(1)) information on quota fulfillment units credited to the account in the Registry (number of quota fulfillment units and date of their crediting, details of the decision of the executive body of the constituent entity of the Russian Federation participating in the experiment, determined by the supreme executive body of that constituent entity of the Russian Federation, authorized to conduct the experiment on the territory of that constituent entity of the Russian Federation (hereinafter referred to as the authorized body), on the issuance of quota fulfillment units) (if available);

г) information on all transactions related to the transfer of carbon units and/or quota fulfillment units (date of the transaction, numbers of carbon units and/or quota fulfillment units, information about the debiting account and the crediting account, information specified in the basis for the transfer of carbon units and/or quota fulfillment units - information about the transaction (civil law contract) on the basis of which the transfer of the carbon unit and/or quota fulfillment unit was made (details (date, number), type of civil law contract or information about other legal grounds for the transfer of the carbon unit and/or quota fulfillment unit);

д) information on existing encumbrances on carbon units and/or quota fulfillment units;

е) information on all transactions related to the retirement of carbon units and/or quota fulfillment units, including in cases of retirement of carbon units for the purpose of reducing the carbon footprint - date of the transaction, details of the instruction of the accountholder (date and number) and number of retired carbon units, information about the other person, provided for in paragraph 16 of these Rules, information about the transaction on the basis of which the retirement of carbon units was made (details of the civil law contract (date, number), type of civil law contract

or information about other legal grounds for the retirement of carbon units) in relation to the other person.

19. Amending information (data) about a climate project and about the applicant in the Registry shall be carried out by the operator on the basis of an application for amendment of information, submitted by the applicant (hereinafter referred to as the application for amendment of information), with the attachment of supporting documents, the list of which shall be established by the operator.

20. The operations provided for in paragraph 19 of these Rules shall be carried out within 20 working days from the date of receipt of the application for amendment of information by the operator.

21. The operator shall refuse to carry out the operations provided for in paragraph 19 of these Rules if the applications for amendment of information and/or documents contain unreliable information and/or unlawful requirements, as well as if the execution of the application for amendment of information would lead to a violation of the requirements of the legislation of the Russian Federation and/or the Agreement.

22. The operator shall notify the applicant of the performance or refusal to perform the operation provided for in paragraph 19 of these Rules within 2 working days from the date of its performance or from the date of the decision to refuse to perform the operation by sending an information letter (in case of performance of the operation) or a reasoned notification (in case of refusal to perform the operation).

23. Registration of a project in the Registry shall be carried out by the operator on the basis of an application for registration of a project, submitted by the project proponent (hereinafter referred to as the application for registration of a project), with the attachment of the following documents and information:

a) a document confirming the authority of the head of the project proponent or another authorized person who signed the application for registration of the project;

б) documents and information, taking into account the restrictions provided for in paragraph 7 of these Rules, submitted by the project proponent to the accredited entity for the conformity assessment of the project as a climate project provided for by Part 2(1) of Article 9 of the Federal Law "On Limitation of Greenhouse Gas Emissions", the report on the said assessment and the positive opinion of the accredited entity;

b) the decision on project approval, as provided for in the Additional Conditions for Project Registration and Carbon Unit Issuance (if available).

24. The application for registration of a project together with the documents and information attached to it, provided for in paragraph 23 of these Rules, shall be signed with an enhanced qualified electronic signature of the head of the project proponent or another authorized person and sent to the operator.

25. The operator, within 20 working days from the date of receipt of the application for registration of a project and the documents and information attached to it, provided for in paragraph 23 of these Rules, shall verify them for compliance with the following requirements:

a) presence of the signature of the head or other authorized person on the application for registration of a project in accordance with the document confirming the relevant authority;

6) completeness and fullness of filling in the documents and information attached to the application for registration of a climate project, provided for in paragraph 23 of these Rules.

26. If the application for registration of a project and the documents and information attached to it, provided for in paragraph 23 of these Rules, are found not to comply with one or more of the requirements specified in paragraph 25 of these Rules, as well as if the execution of the application for registration of a project would lead to a violation of the requirements of the legislation of the Russian Federation and/or the Agreement, the operator shall refuse to register the project in the Registry, and shall notify the project proponent thereof by sending a reasoned notification. The reasoned notification shall be sent within 5 working days from the date of completion of the verification of the application for registration of a project.

27. If the application for registration of a project and the documents and information attached to it, provided for in paragraph 23 of these Rules, comply with the requirements specified in paragraph 25 of these Rules, the operator shall register the project in the Registry within 10 working days from the date of completion of their verification in accordance with paragraph 25 of these Rules.

28. Registration of a project in the Registry shall be carried out by the operator making a corresponding entry in the Registry (for each entry, the date of its entry into the Registry is indicated). From the date of entry into the Registry of the record on the project, such project shall be deemed a climate project.

29. The record in the Registry on a climate project includes the information provided for in paragraphs 16 and 17 of these Rules.

30. Upon registration of a project in the Registry, the corresponding climate project is assigned an individual number (hereinafter referred to as the project number).

The project number is assigned automatically from the date of entry into the Registry of the first record on the climate project.

31. The project number is unique, is assigned once and cannot be changed. The project number shall not be reused.

32. The project number consists of the following parts, separated by a "-" (hyphen) sign:

a) 1st part - 2 digits defining the code of the constituent entity of the Russian Federation at the location of the climate project in accordance with the All-Russian Classifier of Objects of Administrative-Territorial Division. If the climate project is implemented on the territory of several constituent entities of the Russian Federation, then the 1st part of the project number consists of the digits "00";

b) 2nd part - 4 digits defining the year of assignment of the individual number;

c) 3rd part - 8 digits defining the serial number of the climate project within the Russian Federation, generated sequentially for each new climate project.

33. The location of the land plot or land plots on which climate projects are implemented shall be indicated in accordance with the information on the address or location of the land plot (including the cadastral number of such land plot or land plots) contained in the Unified State Register of Real Estate. The coordinates of characteristic boundary points of each land plot on which the climate project is implemented (if available) shall be indicated in accordance with the information contained in the Unified State Register of Real Estate.

34. Simultaneously with the registration of a project, the operator shall enter into the Registry information on the carbon units planned to be issued into turnover for such project.

35. The operator shall make a record of the carbon units planned to be issued into turnover in the number specified in the positive opinion of the accredited entity submitted in accordance with subparagraph "6" of paragraph 23 of these Rules.

35(1). Upon registration of a project or upon amendment of information on a climate project, the operator shall assign to the climate project a label as a climate project for international cooperation purposes, where a decision on project approval as provided for in the Additional Conditions for Project Registration and Carbon Unit Issuance exists.

36. The operator shall notify the project proponent of the registration of the climate project in the Registry by sending him an information letter on the results of registration with the attachment of an extract from the Registry within 5 working days from the date of registration.

37. The operator shall post on the official website the following information:

- on climate projects registered in the Registry, which includes the information and documents specified in the second through fifth paragraphs of subparagraph "a" and the second through fourth paragraphs of subparagraph "a(1)" of paragraph 16, and in subparagraphs "6" through "3", "k" through "p", "r" and "y" of paragraph 17 of these Rules;

- on retired carbon units, which is indicated in the following scope of information: date of the transaction related to the retirement of carbon units, numbers and quantity of retired carbon units, the purpose of the retirement of carbon units in accordance with paragraph 60 of these Rules, information about the accountholder and/or the other person to the extent of the information specified in the second through fifth paragraphs of subparagraph "a" and the second through fourth paragraphs of subparagraph "a(1)" of paragraph 16 of these Rules.

When posting information in accordance with the second and third paragraphs of this clause in relation to natural persons, including individual entrepreneurs, the first letters of the surname, first name and patronymic (if any) shall be indicated.

38. An account in the Registry shall be opened by the operator on the basis of the Agreement and within the timeframes established therein. Such an account may be opened without simultaneously crediting carbon units and/or quota fulfillment units to it.

39. The basis for closing an account in the Registry is termination of the Agreement. Carbon units and/or quota fulfillment units upon closing the account in the Registry shall be cancelled and credited to the withdrawal account.

40. The withdrawal account is unified for the entire Registry, is opened upon establishment of the Registry and is maintained by the operator independently.

41. Retired (cancelled) carbon units and/or quota fulfillment units shall be credited to the withdrawal account and stored there.

42. Information on the turnover of retired and cancelled carbon units and/or quota fulfillment units shall be preserved when they are credited to the withdrawal account.

Retired and cancelled carbon units and/or quota fulfillment units in the prescribed manner shall not be subject to restoration.

43. Issuance of carbon units into turnover shall be carried out by the operator on the basis of an application of the project proponent for issuance (hereinafter referred to as the application for issuance) with the attachment of the following documents:

a) a document confirming the authority of the head of the project proponent or another authorized person who signed the application for issuance;

б) the project report.

в) the decision on approval of carbon unit issuance, as provided for in the Additional Conditions for Project Registration and Carbon Unit Issuance (if available).

44. The application for issuance together with the attached documents provided for in paragraph 43 of these Rules shall be signed with an enhanced qualified electronic signature and sent to the operator.

45. The operator, within 10 working days from the date of receipt of the application for issuance and the documents attached to it, provided for in paragraph 43 of these Rules, shall verify them for compliance with the following requirements:

a) presence of the signature of the authorized person on the application for issuance in accordance with the document confirming the relevant authority;

б) completeness of the documents attached to the application for issuance, provided for in paragraph 43 of these Rules.

46. If the application for issuance and the documents attached to it, provided for in paragraph 43 of these Rules, are found not to comply with one of the requirements specified in paragraph 45 of these Rules, as well as if the execution of the application for issuance would lead to a violation of the requirements of the legislation of the Russian Federation and/or the Agreement, the operator shall refuse to issue the carbon units, and shall notify the project proponent thereof by sending him a reasoned notification within 5 working days from the date of completion of the verification of the application for issuance and the documents attached to it, provided for in paragraph 43 of these Rules.

47. If the application for issuance and the documents attached to it, provided for in paragraph 43 of these Rules, comply with the requirements specified in paragraph 45 of these Rules, the operator shall notify the applicant of the issuance of carbon units within 5 working days from the date of completion of the verification of the said documents.

Carbon units issued in accordance with the first paragraph of this clause shall be credited to the account of the participant in the turnover of carbon units in the Registry no later than the day following the day of receipt by the operator of the instruction of the accountholder.

48. When the issued carbon units are credited to the account in the Registry, the operator shall make a corresponding entry on the account in the Registry (for each entry, the date of its entry is indicated). From the date of entry into the Registry of the record on the crediting of carbon units, such carbon units shall be deemed issued into turnover.

48(1). Upon issuance of carbon units, the operator shall assign a label to carbon units issued as a result of climate project implementation for international cooperation purposes, where a decision on approval of carbon unit issuance as provided for in the Additional Conditions for Project Registration and Carbon Unit Issuance exists.

48(2). In the absence of the decision on approval of carbon unit issuance as provided for in the Additional Conditions for Project Registration and Carbon Unit Issuance, the operator shall not assign the label referred to in paragraph 48(1) of these Rules to the carbon units. The absence of the decision on approval of carbon unit issuance as provided for in the Additional Conditions for Project Registration and Carbon Unit Issuance shall not prevent the issuance of carbon units for purposes other than international cooperation.

49. Carbon units shall be credited to the account of the project proponent in the Registry in the number specified in the project report and corresponding to the reduction (prevention) of greenhouse gas emissions and/or enhancement of greenhouse gas removals achieved as a result of the climate project implementation, expressed in a mass equivalent to 1 tonne of carbon dioxide.

49(1). Issuance of quota fulfillment units shall be carried out in accordance with Part 14 of Article 8 of the Federal Law "On Conducting an Experiment to Limit Greenhouse Gas Emissions in Certain Constituent Entities of the Russian Federation".

49(2). Crediting of issued quota fulfillment units to an account in the Registry for the purpose of issuing them into turnover shall be carried out by the operator on the basis of an application of the accountholder, who is a regionally regulated entity in accordance with the Federal Law "On Conducting an Experiment to Limit Greenhouse Gas Emissions in Certain Constituent Entities of the Russian Federation" (hereinafter referred to as the application for crediting), with the attachment of the following documents:

a) a document confirming the authority of the head of the regionally regulated entity or another authorized person who signed the application for crediting;

b) a copy of the decision on the issuance of quota fulfillment units, adopted by the authorized body in accordance with Part 14 of Article 8 of the Federal Law "On Conducting an Experiment to Limit Greenhouse Gas Emissions in Certain Constituent Entities of the Russian Federation" (hereinafter referred to as the issuance decision).

49(3). The application for crediting with the attached documents provided for in paragraph 49(2) of these Rules shall be signed with an enhanced qualified electronic signature and sent to the operator.

49(4). The operator, within 5 working days from the date of receipt of the application for crediting and the documents attached to it, provided for in paragraph 49(2) of these Rules, shall verify them for compliance with the following requirements:

a) presence of the signature of the authorized person on the application for crediting in accordance with the document confirming the relevant authority;

b) completeness of the documents attached to the application for crediting, provided for in paragraph 49(2) of these Rules.

49(5). If the application for crediting and the documents attached to it, provided for in paragraph 49(2) of these Rules, are found not to comply with one of the requirements specified in paragraph 49(4) of these Rules, as well as if the execution of the application for crediting would lead to a violation of the requirements of the legislation of the Russian Federation and/or the Agreement, the operator shall refuse to credit the quota fulfillment units, and shall notify the applicant thereof by sending him a reasoned notification within 5 working days from the date of completion of the verification of the application for crediting and the documents attached to it, provided for in paragraph 49(2) of these Rules.

49(6). If the application for crediting and the documents attached to it, provided for in paragraph 49(2) of these Rules, comply with the requirements specified in paragraph 49(4) of these Rules, the operator shall credit the quota fulfillment units to the account of the regionally regulated entity in the Registry no later than the day following the day of completion of the verification of the said documents, and shall notify the applicant thereof.

49(7). When the issued quota fulfillment units are credited to the account in the Registry, the operator shall make a corresponding entry on the account in the Registry (for each entry, the date of its entry is indicated). From the date of entry into the Registry of the record on the crediting of quota fulfillment units, such quota fulfillment units shall be deemed issued into turnover.

49(8). Quota fulfillment units shall be credited to the account of the regionally regulated entity in the Registry in the number specified in the issuance decision.

50. The record in the Registry on the issuance into turnover and crediting of carbon units and/or quota fulfillment units to the account in the Registry includes the information provided for in paragraph 18 of these Rules.

51. When each carbon unit as a result of the implementation of a climate project and/or each quota fulfillment unit is credited to the account in the Registry, such carbon unit and/or quota fulfillment unit is assigned a number (hereinafter referred to as the unit number).

52. The unit number is assigned automatically from the date of making the first entry on the account.

53. The unit number is assigned once and cannot be changed.

54. The number of a carbon unit consists of the following parts, separated by a "-" (hyphen) sign, and between the 9th and 10th parts by a ":" (colon) sign, if the number of carbon units is more than one:

a) 1st part - the abbreviated alphabetic name of the Registry;

б) 2nd part - the numerical country code of the project's country of origin in accordance with the All-Russian Classifier of Countries of the World;

в) 3rd part - the numerical class code designation in accordance with the All-Russian Classifier of Types of Economic Activity corresponding to the sectoral affiliation of the climate project;

г) 4th through 6th parts - the 1st through 3rd parts of the project number assigned in accordance with paragraph 32 of these Rules, as a result of the implementation of which the carbon unit was issued;

д) 7th part - the calendar year during which the reduction (prevention) of greenhouse gas emissions and/or enhancement of greenhouse gas removals was achieved as a result of climate project implementation and which constitutes the basis for carbon unit issuance;

е) 8th part - the serial number of the carbon unit issuance based on each project report;

ж) 9th part - the start of the serial batch of the issued carbon unit (numbering starts from the digit 1 for each new issuance);

з) 10th part - the end of the serial batch of the issued carbon unit.

54(1). The number of a quota fulfillment unit consists of the following parts, separated by a "-" (hyphen) sign:

a) 1st part - 2 digits defining the code of the constituent entity of the Russian Federation in accordance with the All-Russian Classifier of Objects of Administrative-Territorial Division, whose authorized body adopted the decision on the issuance of the quota fulfillment unit;

б) 2nd part - 4 digits defining the year in which the quota fulfillment units were issued;

в) 3rd part - corresponds to the number of the decision of the authorized body on the issuance of quota fulfillment units.

55. The operator shall notify the accountholder of the issuance into turnover and crediting of carbon units to the account in the Registry and/or crediting of quota fulfillment units to the account in the Registry by sending him an account report within 5 working days from the date of making the corresponding entry on the account.

56. The operator shall post information on carbon units issued into turnover as a result of the implementation of a climate project and credited to the account and/or credited quota fulfillment units in the Registry on the official website. The information shall be posted to the extent of the information specified in subparagraph "p" of paragraph 17 and subparagraph "в(1)" of paragraph 18 of these Rules.

57. The operator shall carry out the following transactions on the account in the Registry in accordance with the instruction of the accountholder, certified with an enhanced qualified electronic signature (hereinafter referred to as the instruction):

a) transfer of carbon units and/or quota fulfillment units by debiting carbon units and/or quota fulfillment units from the account in the Registry of the accountholder and crediting them to the account in the Registry of the acquirer of carbon units and/or quota fulfillment units;

б) crediting carbon units and/or quota fulfillment units to the account in the Registry (except for the cases provided for in subparagraphs "a", "г" and "д" of this paragraph and paragraph 57(1) of these Rules);

в) debiting carbon units and/or quota fulfillment units from the account in the Registry (except for the cases provided for in subparagraphs "a" and "д" of this paragraph);

г) crediting carbon units to the account in the Registry upon their issuance into turnover as a result of the implementation of a climate project;

д) retirement of carbon units and/or quota fulfillment units in accordance with Part 10 of Article 10 of the Federal Law "On Limitation of Greenhouse Gas Emissions" or Part 11 of Article

11 of the Federal Law "On Conducting an Experiment to Limit Greenhouse Gas Emissions in Certain Constituent Entities of the Russian Federation".

57(1). The transaction on the account in the Registry for crediting issued quota fulfillment units to the account in the Registry of a regionally regulated entity shall be carried out by the operator on the basis of an application for crediting in accordance with paragraphs 49(2) - 49(4), 49(6) - 49(8) of these Rules.

57(2). Instructions shall specify the parts of the carbon unit number from the 1st through the 8th part inclusive. The operator shall execute the instruction by carrying out the transaction with the carbon units, starting from the carbon units having the lower value of the 9th part of the carbon unit number.

58. Transactions with carbon units and/or quota fulfillment units specified in paragraph 57 of these Rules shall be carried out by the operator no later than the day following the day of receipt by the operator of the instruction, except for transactions in accordance with instructions on retirement of carbon units for the purposes of international cooperation (including for the purpose of compensation of greenhouse gas emissions by aeroplane operators from international flights), the processing period for which shall not exceed 5 working days.

59. Transfer of carbon units and/or quota fulfillment units between participants in the turnover of carbon units shall be carried out on the basis of an instruction by debiting carbon units and/or quota fulfillment units from his account and crediting them to the account in the Registry of the acquirer of carbon units and/or quota fulfillment units, including taking into account the specifics of the legal regulation of concluding transactions on organized trades (in case of turnover of carbon units and/or quota fulfillment units on organized trades).

60. Retirement of carbon units for the purpose of reducing the carbon footprint, fulfilling a quota, or international cooperation (including for the purpose of compensation of greenhouse gas emissions by aeroplane operators from international flights) and/or retirement of quota fulfillment units for the purpose of fulfilling a quota shall be carried out by the operator in accordance with an instruction by debiting carbon units and/or quota fulfillment units from his account and crediting them to the withdrawal account.

If the accountholder retires carbon units for the purpose of reducing the carbon footprint of another person, the presence of an account in the Registry for such person is not mandatory.

The accountholder shall indicate in the instruction information about the other person referred to in the second paragraph of this clause, to the extent provided for in subparagraphs "a" through "6(1)" of paragraph 16 of these Rules.

Responsibility for the accuracy of the information, including information about the other person whose carbon footprint is reduced as a result of the retirement of carbon units, indicated in the instruction, shall be borne by the owner of carbon units.

61. The operator shall not accept an instruction, an application for amendment of information, an application for registration of a project, an application for issuance, or an application for crediting in the following cases:

a) the application for amendment of information, the application for registration of a project, the application for issuance, or the application for crediting and/or the instruction do not comply with the forms established by the operator;

6) the application for amendment of information, the application for registration of a project, the application for issuance, or the application for crediting and/or the instruction have not passed the procedures for verifying the validity of the enhanced qualified electronic signature in accordance with the requirements of the legislation of the Russian Federation in the field of electronic signature, the texts of the application for amendment of information, the application for registration of a project, the application for issuance, or the application for crediting and/or the instruction and/or the documents attached to them are illegible, as well as in other cases related to violation of the requirements of the legislation of the Russian Federation and these Rules. The requirements of this subparagraph regarding the procedure for verifying the validity of the enhanced qualified electronic signature shall apply taking into account the provisions of paragraph 70 of these Rules;

b) the application for amendment of information, the application for registration of a project, the application for issuance, the application for refusal to extend the contract, or the application for crediting and/or the instruction are signed by a person who does not have the right to act on behalf of the applicant.

62. The operator shall have the right to suspend the execution of an instruction and/or refuse to execute it in the event of arrears of the accountholder in payment for the operator's services, as well as in other cases provided for by the Agreement.

63. The operator shall not execute an instruction in the following cases:

a) execution of the instruction requires carrying out an operation not provided for by the requirements of the legislation of the Russian Federation, these Rules or the Agreement and/or violating the said requirements;

6) there is no required number of carbon units and/or quota fulfillment units on the account in the Registry for the execution of the instruction;

б) transactions on the account in the Registry are suspended in accordance with the legislation of the Russian Federation;

г) the account in the Registry or the carbon units and/or quota fulfillment units on it are seized.

64. The operator, no later than the day following the day of receipt by the operator of the instruction, shall send the accountholder a reasoned notification in electronic form about the suspension and/or refusal to execute the instruction.

65. Carbon units and/or quota fulfillment units shall be deemed transferred or retired (cancelled) from the date the operator makes the corresponding entry on the account of the acquirer of carbon units and/or quota fulfillment units or on the withdrawal account, respectively.

66. The operator shall notify the accountholder in the Registry of the execution of the instruction and of the performed transaction on the account by sending him an account report no later than the day following the day of making the corresponding entry on the account. When transferring carbon units and/or quota fulfillment units, the operator shall notify the acquirer of carbon units and/or quota fulfillment units of their crediting to his account in the Registry by sending him an account report no later than the day following the day of making the entry on the account.

67. Information from the Registry on the number of issued and/or retired (cancelled) carbon units and/or quota fulfillment units shall be provided by the operator upon request of the Ministry of Economic Development of the Russian Federation and the Federal Service for Hydrometeorology and Environmental Monitoring free of charge.

Information from the Registry about the accountholder, the project proponent and other participants of the climate project, including investors and contractors, to the extent of the information specified in paragraph 16 of these Rules, shall be provided by the operator upon request of the tax authority, as well as state authorities involved in the provision of state and municipal services and the execution of state and municipal functions, including control (supervisory) functions, in the form of extracts signed with an enhanced qualified electronic signature of the operator, free of charge.

The information specified in this paragraph shall be provided using the unified system of interagency electronic interaction within 5 working days from the date of receipt by the operator of the corresponding request.

The operator shall ensure access of the Ministry of Economic Development of the Russian Federation to the information contained in the Registry, including the possibility of preparing reports on the status of the Registry, climate projects, turnover of carbon units and quota fulfillment units, and other analytical information in accordance with the forms and formats of electronic documents established by the Ministry.

Information from the Registry about the accountholder to the extent of the information specified in paragraph 16 of these Rules, as well as information from the Registry about the presence of an account in the Registry, the number of carbon units and/or quota fulfillment units in the account, the date and basis for their crediting, information on existing encumbrances on carbon units and/or quota fulfillment units shall be provided by the operator upon request of a notary, sent through the unified information system of the notary, in the form of extracts signed with an enhanced qualified electronic signature of the operator.

68. The operator, upon request of the accountholder, generated and sent to the operator, shall confirm the rights of such accountholder to carbon units and/or quota fulfillment units and/or provide information on the transaction(s) on the account in the Registry on the retirement of carbon units by providing an extract from the Registry (hereinafter referred to as the account statement).

The account statement or a message about the absence of information in the Registry shall be provided to the participant in the turnover of carbon units by the operator within 10 working days from the date of receipt of the request specified in the first paragraph of this clause.

The account statement shall be signed with an enhanced qualified electronic signature of an authorized person of the operator and contain the information specified in subparagraphs "a", "б" and "д" of paragraph 18 of these Rules, as well as information on the date and time of its generation.

Information on the transaction on the account in the Registry on the retirement of carbon units for the purpose of reducing the carbon footprint of another person shall be reflected in the account statement provided by the operator to the accountholder on the basis of whose instruction the retirement transaction was carried out.

Information on the transaction(s) on the account in the Registry on the retirement of carbon units shall be reflected in the account statement with a breakdown by purposes of retirement of carbon units as provided for in paragraph 60 of these Rules.

69. The forms of the application for amendment of information, the application for registration of a project, the application for issuance, the application for crediting, and the instruction shall be established by the operator.

70. Participants in the turnover of carbon units shall generate and submit instructions, applications for amendment of information, applications for registration of a project, applications for issuance, applications for crediting, requests and other documents and/or information provided for by these Rules and the Agreement, in electronic form using the federal state information system "Unified Portal of State and Municipal Services (Functions)" or, if the participants in the turnover of carbon units are foreign legal entities that do not have a permanent establishment in the Russian Federation, or foreign citizens, using the electronic document management information systems provided for by the Agreement. Applications for amendment of information, other documents and/or information (except for instructions) provided for by these Rules, as well as requests and other documents and/or information provided for by the Agreement, sent by foreign legal entities that do not have a permanent establishment in the Russian Federation, or foreign citizens in electronic form, may also be signed with an electronic signature created in accordance with the laws of a foreign state and international standards, in cases established by Article 7 of the Federal Law "On Electronic Signature".

Information letters, reasoned notifications, account reports, account statements, and messages about the absence of information in the Registry shall be sent by the operator to participants in the turnover of carbon units in electronic form using the said information systems.

71. The operator shall ensure the storage of documents that are the basis for carrying out transactions in the Registry with carbon units and with quota fulfillment units, as well as in relation to a climate project, during the entire period of turnover of the said carbon units and/or quota fulfillment units, as well as for 5 years from the date of retirement (cancellation) of the last carbon unit of such climate project and/or quota fulfillment unit.
